This is a formal/budgetary proposal for the RTLS system to be installed in a typical plant for workers safety and tracking solution. It still needs to be analyzed with the WiFi infrastructure. Location-Engine is assumed to be used with generic compatible managed Access Points (Aruba, Rukus, etc.). Cisco will require a change in the location engine model but the price \$0 remains unchanged.

Quantities had been estimated based on your initial conversation and information. Radix will need to purchase a Development KIT for engineering. If the intention is to have a Try-And-Buy the customer expectations must be set and the proposal must be approved by the manufacturer against full customer site details.
