Enviamos la siguiente propuesta técnica y económica con la finalidad de formar una idea de precio para el suministro de un sistema de seguimiento y seguridad de trabajadores del tipo RTLS basado en la plataforma de Visibilidad Unificada MobileView. Hemos considerado TAGs i100 de seguridad intrínseca que son más costosos que los TAG T2 sin clasificación de área.

Con respecto a los servicios de ingeniería, en lo que respecta a la configuración del sistema, con dos personas durante dos meses, dedicadas al proyecto debería ser suficiente. Esto no incluye servicios de instalación de campo para cubrir cuestiones relacionadas con la infraestructura de comunicaciones y de red WiFi.
